

SAGAR BANSODE

Data Analyst | SQL | PostgreSQL | Python | Power BI | Excel

+91 7820816641 | sagarbansode.work@gmail.com | Pune, India | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with 2.5+ years of experience using SQL, PostgreSQL, Python, Power BI, and Excel to develop reporting solutions and business intelligence dashboards for USA-based clients. Experienced in data validation, exploratory data analysis (EDA), SQL querying, dashboard development, data modeling, and KPI reporting across Sales Operations and Supply Chain domains. Built 12+ interactive Power BI dashboards to monitor business performance and deliver actionable insights for stakeholders. Strong analytical and problem-solving skills with hands-on experience collaborating with cross-functional teams to support data-driven decision-making.

TECHNICAL SKILLS

Programming: Python

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Databases & Querying: SQL, PostgreSQL (Aggregations, Advanced Joins, CTEs, Window Functions)

Data Visualization & BI: Power BI, Power Query, DAX, Microsoft Excel (Pivot Tables, VLOOKUP, Charts)

Core Competencies: Exploratory Data Analysis (EDA), Data Collection, Data Cleaning & Validation, Outlier Detection, Dashboard Development, KPI Monitoring, Data Modeling, ETL Concepts (Extract, Transform, Load), Multi-source Data Integration

Cloud & Data Warehousing: Snowflake (Basic), AWS S3 (Basic)

PROFESSIONAL EXPERIENCE

Ventas Softech Pvt. Ltd.

Bangalore, India | Remote

Service-Based IT Company | USA-Based Client

Data Analyst

Jun 2025 - Present

Domain: Logistics & Supply Chain Analytics

Key Responsibilities:

- Promoted to Data Analyst to support logistics and inventory analytics initiatives for a USA-based client within a service-based environment.
- Created 12+ interactive Power BI dashboards using DAX, Power Query, and data modeling to monitor inventory movement, warehouse operations, and transportation performance.
- Built executive KPI dashboards tracking Inventory Turnover, Fill Rate, Warehouse Utilization, Order Accuracy, On-Time Delivery, and Average Delivery Time to support operational decision-making.
- Analyzed inventory and logistics data using SQL (PostgreSQL) and Python to identify trends, stock shortages, warehouse inefficiencies, and operational bottlenecks.
- Developed reusable DAX measures, Power Query transformations, and data models to create consistent and maintainable Power BI dashboards.
- Performed trend and variance analysis to uncover operational issues and identify improvement opportunities for inventory planning and warehouse efficiency.
- Partnered with cross-functional teams and USA-based stakeholders to gather reporting requirements, translate business needs, and deliver analytical solutions.
- Delivered SQL-based reports and Power BI reporting solutions to support operational reporting and business decision-making.

Key Responsibilities:

- Extracted, validated, transformed, and prepared relational datasets using PostgreSQL to support sales operations analytics and reporting.
- Consolidated data from Sales Orders, Customer Master, Billing, Installation, and Follow-up systems to create a centralized dataset supporting sales operations and MIS reporting.
- Cleaned and transformed datasets using Python (Pandas, NumPy), resolving missing values, duplicates, and data inconsistencies to improve data quality.
- Performed Exploratory Data Analysis (EDA) using Matplotlib and Seaborn to identify sales trends, billing performance, customer behavior patterns, and operational anomalies.
- Developed and executed 30+ SQL queries using Joins, CTEs, Window Functions, and Aggregate Functions to support data analysis and reporting.
- Monitored business KPIs including Order Value, Billing Status, Payment Status, Revenue at Risk, and Pending Installations to support timely operational decisions.
- Delivered analytical reports and business insights to support sales performance tracking and operational decision-making.
- Partnered with senior analysts and USA-based stakeholders to deliver reporting solutions, maintain data quality standards, and support ongoing analytics initiatives.

DATA ANALYTICS PROJECTS

Logistics & Warehouse Performance Dashboard**Tools: Power BI | DAX | Power Query | Microsoft Excel**[GitHub Link](#)

- Designed an interactive Power BI reporting solution to monitor warehouse operations and logistics performance.
- Built reusable data models, DAX measures, and Power Query transformations to prepare, transform, and analyze operational data.
- Developed KPI dashboards tracking Inventory Turnover, Fill Rate, Warehouse Utilization, Order Accuracy, On-Time Delivery, Average Delivery Time, and Transportation Cost.
- Used drill-through reports and interactive visualizations to enable detailed operational analysis and performance monitoring.

Inventory Management Analytics[GitHub Link](#)**Tools: Python | Pandas | NumPy | PostgreSQL | Matplotlib | Seaborn**

- Performed Exploratory Data Analysis (EDA) on logistics datasets using Python, PostgreSQL, Matplotlib, and Seaborn.
- Cleaned, transformed, and validated data using Python and SQL.
- Developed SQL queries using Joins, CTEs, Window Functions, and Aggregate Functions for data analysis and reporting.
- Created visualizations to identify inventory trends, warehouse performance patterns, and operational bottlenecks.

EDUCATION

B.E. in Mechanical Engineering
Percentage: 72.10%

Dr. APJ Abdul Kalam University, Indore
Graduated: 2023

CERTIFICATIONS

Professional Certification in Data Analytics (SQL, PostgreSQL, Python, Power BI, Excel)
