PROFESSIONAL SUMMARY

Data Analyst with 2.5+ years of experience developing Business Intelligence (BI) dashboards and data-driven reporting solutions using SQL, PostgreSQL, Python, Power BI, and Microsoft Excel for USA-based clients. Experienced in data extraction, validation, exploratory data analysis (EDA), data modeling, KPI reporting, and dashboard development across Sales Operations and Supply Chain domains. Built 12+ interactive Power BI dashboards to monitor business performance, automate reporting, and support data-driven decision-making. Proficient in SQL querying, Power Query, DAX, and cross-functional stakeholder collaboration to deliver scalable analytics and reporting solutions. Strong analytical, problem-solving, and business analysis skills with a focus on improving reporting efficiency and data quality.

TECHNICAL SKILLS

Programming: Python

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Databases & Querying: PostgreSQL | SQL (Joins, CTEs, Window Functions, Aggregate Functions, Subqueries)

Data Visualization & BI: Power BI, Power Query, DAX, Microsoft Excel (Pivot Tables, VLOOKUP, Charts)

Core Competencies: Exploratory Data Analysis (EDA), Data Collection, Data Cleaning & Validation, Data Modeling, Dashboard Development, KPI Monitoring, Business Intelligence Reporting, Trend Analysis, Data Quality Management, Multi-source Data Integration, ETL Concepts (Extract, Transform, Load)

Cloud & Data Warehousing: Exposure to Snowflake, Exposure to AWS S3

PROFESSIONAL EXPERIENCE

Ventas Softech Pvt. Ltd.

Bangalore, India | Remote

Service-Based IT Company | USA-Based Client

Role: Data Analyst

Jun 2025 - Present

Domain: Logistics & Supply Chain Analytics

Key Responsibilities:

- Promoted to Data Analyst to support logistics and inventory analytics initiatives for a USA-based client within a service-based environment.
- Designed and developed 12+ interactive Power BI dashboards using DAX, Power Query, and data modeling to monitor inventory movement, warehouse operations, and transportation performance.
- Built executive KPI dashboards tracking Inventory Turnover, Fill Rate, Warehouse Utilization, Order Accuracy, On-Time Delivery, and Average Delivery Time to support operational decision-making.
- Analyzed inventory and logistics data using SQL (PostgreSQL) and Python to identify trends, stock shortages, warehouse inefficiencies, and operational bottlenecks.
- Developed reusable DAX measures, Power Query transformations, and data models to create consistent and maintainable Power BI dashboards.
- Collaborated with cross-functional teams and USA-based stakeholders to gather reporting requirements, translate business needs into analytical solutions, and deliver high-quality dashboards.
- Delivered SQL-based reports and Power BI reporting solutions that improved reporting efficiency and supported operational decision-making.

Role: Junior Data Analyst

Feb 2024 - May 2025

Domain: Office Automation Sales Operations & MIS Analytics

Key Responsibilities:

- Extracted, validated, transformed, and prepared relational datasets using PostgreSQL to support Sales Operations analytics and MIS reporting.
- Consolidated data from Sales Orders, Customer Master, Billing, Installation, and Follow-up systems into a centralized reporting dataset to improve reporting consistency.
- Cleaned and transformed datasets using Python (Pandas and NumPy), resolving missing values, duplicates, and data inconsistencies to improve data quality.
- Performed Exploratory Data Analysis (EDA) using Matplotlib and Seaborn to identify sales trends, billing performance, customer behavior patterns, and operational anomalies.
- Developed and executed 30+ SQL queries using Advanced Joins, CTEs, Window Functions, Aggregate Functions, and Subqueries to support reporting and business analysis.
- Monitored business KPIs including Order Value, Billing Status, Payment Status, Revenue at Risk, and Pending Installations to support operational decision-making.
- Delivered analytical reports and business insights that enabled stakeholders to track sales performance and monitor operational efficiency.
- Collaborated with senior analysts, cross-functional teams, and USA-based stakeholders to deliver reporting solutions while maintaining data quality and reporting standards.

PERSONAL DATA ANALYTICS PROJECTS

Logistics & Warehouse Performance Dashboard

[GitHub](#)

Tools: Power BI | DAX | Power Query | Microsoft Excel

- Designed an interactive Power BI dashboard to monitor warehouse and logistics performance.
- Built reusable DAX measures, Power Query transformations, and data models for KPI reporting.
- Built interactive visualizations for operational performance analysis.

Blinkit Sales Performance Dashboard

[GitHub](#)

Tools: Power BI | DAX | Power Query | Microsoft Excel

- Developed an interactive Power BI dashboard to analyze Blinkit sales performance.
- Designed KPI reports for Total Sales, Average Sales, Items, and Customer Ratings.
- Built visualizations for Outlet, Item Type, and Fat Content analysis.
- Implemented slicers and interactive filters to enable dynamic business reporting.

Inventory Management Analytics

[GitHub](#)

Tools: Python | Pandas | PostgreSQL | Matplotlib | Seaborn

- Performed EDA on inventory datasets using Python and PostgreSQL.
- Cleaned, transformed, and validated operational datasets to improve data quality.
- Developed SQL queries using Joins, CTEs, Window Functions and Aggregate Functions.
- Created insightful data visualizations to identify trends and operational bottlenecks.

EDUCATION

B.E. in Mechanical Engineering

Percentage: 72.10%

Dr. APJ Abdul Kalam University, Indore

Graduated: 2023

CERTIFICATIONS

Professional Certification in Data Analytics (SQL, PostgreSQL, Python, Power BI, MS Excel, EDA)
